Hogs may not be hunted at night. For special hog hunts with dogs, no more than 4 bay or catch dogs per party, no still or stalk hunting permitted. One shotgun per party(buck shot only). Swine brucellosis is caused by a bacteria and is primarily a reproductive tract disease in wild pigs that can be transmitted to humans. Infections are manifest by flu-like symptoms including fever, headaches, muscle and joint soreness and weakness. The fatality rate in humans is very low, but the disease often is prolonged and debilitating. Humans have contracted swine brucellosis from handling and dressing wild swine. This disease is present in many wild hog populations in SC. Persons dressing wild swine should take the following precautions: 1) use disposable rubber gloves and protective eyeglasses while dressing the carcass 2) minimize handling of the reproductive tracts of both sexes 3) dispose of waste parts by burying or burning 4) clean up with hot water and soap after processing and 5) cook meat thoroughly to 160 degrees F prior to eating.
